

Appointment – Amy Carter –Technical Solutions Manager

Gerrie Electric announces the promotion of Amy Carter to Technical Solutions Manager for the Central Region. In this role Amy will be primarily responsible for managing the company's Product Managers and Process Group within the region. She will provide technical support and advice while analyzing market trends and expectations ensuring the group can fulfill its goals.

Amy originally joined the Gerrie team in January 2018, in the role of Automation/Software Product Manager. Prior to this she had been a Professor at Sheridan College in the School of Engineering.

Amy has made an impact on improving our online presence by bringing our technical expertise to the forefront. She brings energy and creativity to everything she does, we truly forward to her continued success!
